EDUCATION

Northeastern University

MS, Game Science and Design (GPA: 3.9/4.0)

Relevant Coursework: Game AI, Spatial and Temporal Design, Mixed Research Methods, Data-Driven Player Modelling

May 2026

Boston, MA

Universidad de los Andes

BS, Computing and Software Engineering

Oct. 2017

Bogotá, Colombia

EXPERIENCE

Dassault Systèmes – SOLIDWORKS

Internship – Installation, licensing and tools software engineer

Jun. 2025 – Aug. 2025

Waltham, MA

- Designed and implemented a **reusable modular UI** system for an early-stage internal application using **C#, WPF, and MVVM**, improving maintainability and enabling scalable feature development.
- Collaborated with engineers to research and prototype internal tools, translating product requirements into functional software systems within a Windows development environment.

Globant - Electronic Arts (EA) | [EA App](#) |

C++ Developer

Dec. 2021 – Aug. 2024

Bogotá, Colombia

- Designed and implemented C++ modules for secure authentication and data sharing between the **EA App** and **Steam and Microsoft Apps**, reducing cross-platform login and account linking issues by 25%.
- Built C++ telemetry modules that collect real-time metrics from distributed services and visualized with Kibana and Grafana dashboards to help engineers resolve 90% of issues within 30 minutes.
- Refactor the update system to preserve session state and processing tasks across deployments, reducing user-reported service interruptions during updates by at least 30% over the next two quarterly releases.

Bizagi Latam

Technical Leader | Software Engineer – Cloud Infrastructure Team

Mar. 2018 – Dec. 2021

Bogotá, Colombia

- Led a 4-person team to deploy Bizagi products across Azure environments for clients, completing 100% of deployments over a 6-month period maintaining SLA compliance with no critical post-deployment incidents.
- Automated Azure infrastructure setup for Bizagi deployments, **cutting manual provisioning time by 70%**.
- Built tools for monitoring, backups, incident recovery, by improving system reliability and halving recovery time.

PROJECTS

Debt Rush | [GitHub](#) | | Unity, C#, Gameplay Systems, Dialogue Systems

- Designed and developed a dialogue system for a 2-player co-op game, supporting shared- and split-screen interaction.
- Implemented modular item and weapon systems, defining core mechanics and supporting varied player strategies.

Smil-E-Mart | [Itch](#) | | Unity, C#, Narrative Systems

- Built a branching narrative system across 5 in-game days, guiding player decisions through customer interactions.
- Designed an emotional interaction system enabling players to interpret and respond to customer states.
- Implemented multiple endings (Good, Bad, True) using condition-based logic and event sequencing.

SKILLS

Game Dev: Unity, Unreal Engine, Behavior Trees,

Languages: C#, C++, .NET, Python, SQL, R

Technologies: Visual Studio, Git, Microsoft Azure, Node.js, Blender, Tableau, Data Visualization, Kibana, Grafana

Soft Skills: Agile, Scrum, Technical Leadership, Emotional Intelligence

LANGUAGES

Spanish: Native, **English:** Fluent, **Japanese:** Basic
